

Assignment 3 was a group project. I worked with Chandler Jensen, Mia Sohn, and Katherine Escoto Licon.

As a team, we spent five days taking 30 pictures next to Smith Hall on the UW campus. Once the 30 pictures were taken, we processed them to find the most prominent colors among all 30 images. Then, we made a new visualization to show those most prominent colors.

In this folder you will find:

- **Lab 3 - Image Processing.ipynb**
 - The notebook in which we processed our 30 images and extracted the information we would use for visualization
- **Lab 3 - Making the Infographic.ipynb**
 - The notebook used to create the visualization of our prominent colors
- **Original Photos**
 - The original 30 pictures taken by Chandler, Mia, Katherine, and myself from Tuesday 2-10-26 through Saturday 2-14-26
- **Processed Photos**
 - The processed versions of those 30 pictures
- **Pictures Spreadsheet**
 - A dataset holding the important information from our processed images
- **Lab 3-3 Project Essay.docx**
 - The essay I submitted for this assignment
