

Assignment 4 was the final major project for our class, with individual homework submissions from February 24th through March 6th.

As a class we took pictures at different locations around the Seattle area, pretending they were taken by an imaginary character. These were uploaded to a Padlet page, with the location and a short story included alongside other information.

Then we individually downloaded this data and conducted some processing techniques on it. The data was then inputted into various infographics with the intention of telling a story about our data.

In this folder you will find:

- **Posts - happy - place - winter26.csv**
 - The original dataset
- **Wrangled Posts - happy - place - winter26.csv**
 - The processed dataset
- **Lab 4 - Processing and Infographics.ipynb**
 - The notebook used to process and visualize the data
- **Lab 4-3 Project Essay.docx**
 - The essay submitted for this assignment
